PROFESSIONAL SUMMARY

Computer Science Engineering student (8.10/10 CGPA) with hands-on experience in backend services, REST APIs, and cloud/DevOps tooling (AWS, Docker, Kubernetes, CI/CD). Built an event-driven identity integration platform using SCIM 2.0 and OAuth 2.0, plus AI agent projects in Python. Strong interest in secure, reliable integrations and automation.

EDUCATION

B.E. in Computer Science & Engineering

CMR University, Bengaluru

Class X (CBSE): Guru Nanak Public School

CGPA: 8.10 / 10.0

2023 – Present

TECHNICAL SKILLS

Languages: Java, Python, JavaScript, SQL, HTML, CSS

Cloud & DevOps: AWS (EC2, S3, Lambda, IAM), Kubernetes, Docker, CI/CD Pipelines, GitHub Actions

Backend & Databases: Node.js, Express.js, REST APIs, SCIM 2.0, OAuth 2.0, MySQL, PostgreSQL, Redis, Firebase

Tools & Platforms: Git, GitHub, Linux, VS Code, Android Studio

EXPERIENCE

Intern | State Bank of India (SBI), Vidya Nagar Branch

4 months

- Handled day-to-day banking operations including internet banking activation and KYC updates.
- Received an "Excellent" conduct rating and a completion certificate from the branch.

PROJECTS

IdentityBridge: Enterprise Identity Integration Platform

Node.js, Express.js, PostgreSQL, Redis, SCIM 2.0, OAuth 2.0, HashiCorp Vault

- Built an event-driven identity integration platform that processes employee lifecycle events from HR systems through secured webhooks.
- Implemented SCIM 2.0 and OAuth 2.0 based provisioning workflows for creating, updating, and deprovisioning users across identity providers.
- Added HMAC request validation, idempotency controls, asynchronous BullMQ job processing, circuit breakers, encrypted data storage, audit logging, and Dead Letter Queue recovery.

AI Research Agent

Python, LangChain, LLMs, APIs, Pydantic

- Built an AI-powered research agent that selects and uses external tools to gather information and generate structured research results.
- Integrated web search, Wikipedia, multiple LLM providers, and custom tools, with Pydantic output validation and automated saving of results.

J.A.R.V.I.S: AI-Powered Personal Voice Assistant

Python, OpenCV, SpeechRecognition, PyTTSx3, Requests, PyAutoGUI

- Developed a Python voice assistant that automates everyday tasks through speech recognition and voice commands.
- Integrated face-recognition authentication, OCR, text-to-speech, weather/news APIs, email automation, YouTube and Google Maps search, and web automation into a multimodal assistant.
